

“responding to the changing  
needs of people with  
learning disabilities”

## Supporting Us

Maintaining and developing our quality range of services in order to provide the best possible support for people with learning disabilities is an increasingly expensive exercise. We currently subsidise all of our service provision, so to ensure that we continue to meet the requirements of all of our clients, we need to raise in excess of 1m each year.

We welcome help with our fundraising and also value the many volunteers that we have engaged across the country that either help out at one of our services or donate professional advice and business skills for free. Why not email us or call to chat about how you could help CARE?

- There is no better way to support CARE than by making a direct donation, or by setting up a regular payment scheme
- Be a friend and make several in return. Why not help out as a volunteer and make a real difference in someone's life?
- Be a volunteer consultant you may have skills that could make a real difference to the organisation. Could you spare a few hours a year?
- By leaving a legacy in your Will to benefit CARE, you will be helping to ensure that we can continue to provide quality support services for people with learning disabilities to enable them to live as independently as possible at the heart of society.

For further information, contact our Fundraising Department.
